## **VOLUNTARY ANNOUNCEMENT XUNFEI SPARK MEDICAL MODEL V3.7**

This announcement is voluntarily made by Xunfei Healthcare Technology Co., Ltd. (the “**Company**”, together with its subsidiaries, the “**Group**”) for the purpose of providing the shareholders of the Company (“**Shareholders**”) and potential investors with information on the latest business development of the Group.

Recently, the Company has fully completed a major upgrade of the Spark Medical Model trained on nationwide domestic computing power, and officially released the Spark Medical Model V3.7. In the latest MedBench agent evaluation by Shanghai Artificial Intelligence Laboratory, the Spark Medical Model topped the ranking with a comprehensive score of 99.6. Spark Medical Model V3.7 has achieved a breakthrough in multimodal technology innovation that deeply integrates medical semantics, medical imaging and speech, driving a comprehensive leap in agent capabilities in medical scenarios. This marks a transition of applications for two major scenarios namely doctors’ clinical diagnosis and treatment, and residents’ health management, from “meeting the threshold of medical practicality” to “deep integration into the entire medical chain”.

Leveraging the industry-leading data flywheel and medical self-iterative evidence-based reasoning technology, the underlying general capabilities of the Spark Medical Model have been comprehensively enhanced, with medical professionalism and personalized service capabilities further deepened. It significantly surpasses GPT-6 Astra, DeepSeek V4.1 Flash and Qwen3.8-Max in key tasks such as medical knowledge Q&A, medical language understanding, diagnosis and treatment recommendations, medical document generation, medical multimodal interaction and medical multi-turn interaction.

For clinicians, the multimodal technology of the diagnostic and treatment assistant has achieved a full-dimensional iterative upgrade. In the medical record writing scenario, the reasonable rate of end-to-end medical record generation deeply integrated with medical speech recognition has increased to 85%, with its capability progressing from practical to easy-to-use, continuously consolidating its industry-leading advantage. In the field of medical imaging, the auxiliary diagnosis capability has improved by more than 15% compared with various domestic and overseas vertical imaging models, and the automated report generation and in-depth quality control capabilities have reached the industry-leading level.

For residents and patients, health interaction and management capabilities have been comprehensively enhanced. Xunfei Xiaoyi has achieved major upgrades in multiple aspects, including comprehensive interpretation of multiple medical reports, dynamic memory management of health records, personalized health risk insights, generation of comprehensive health management plans, and TCM tongue and facial constitution identification and wellness plan recommendations. Xunfei Xiaoyi has expanded from single consultations to continuous health management, addressing the core demand of residents and patients for professional, convenient and continuous health services.

Driven by leading core technologies, the Company will continue to empower medical workers and promote innovation in diagnosis and treatment processes and improvements in the quality and efficiency of medical services. At the same time, with a well-established service loop and profound medical expertise, the Company will provide more reliable and more professional medical and health services to hundreds of millions of residents.

By order of the Board  
**Xunfei Healthcare Technology Co., Ltd.**  
**Dr. Tao Xiaodong**
