INSIDE INFORMATION
CERTAIN UNAUDITED KEY FINANCIAL INFORMATION AND OPERATING PERFORMANCE FOR THE NINE MONTHS ENDED 30 SEPTEMBER 2026

This announcement is made by AsiaInfo Technologies Limited (the "**Company**", together with its subsidiaries, the "**Group**") pursuant to the Inside Information Provisions under Part XIVA of the Securities and Futures Ordinance (Chapter 571, Laws of Hong Kong) and Rule 13.09 of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited.

The substantial shareholder of the Company, Asiainfo Security Technology Co., Ltd. (亞信安全科技股份有限公司) ("**Asiainfo Security**", the shares of which are listed on the Shanghai Stock Exchange (stock code: 688225)) is expected to announce its unaudited results for the third quarter of 2026 on or around 28 October 2026 pursuant to the Rules Governing the Listing of Stocks on Shanghai Stock Exchange. Such results will include certain financial information and operating performance of the Group. To ensure that the shareholders and potential investors of the Company have equal and timely access to the information of the Company, the board of directors of the Company (the "**Board**") is pleased to provide the following unaudited key financial information and operating performance of the Group for the nine months ended 30 September 2026.

For the nine months ended 30 September 2026, the Group recorded a revenue of approximately RMB3,380 million and a net loss of approximately RMB484 million. Excluding the impact of one-off severance compensation arising from workforce structure optimisation, the net loss amounted to approximately RMB176 million. As at 30 September 2026, the Group had total assets of approximately RMB9,202 million and net assets of approximately RMB5,936 million.

The following is the business development and operational status of the Group for the first three quarters of 2026:

For the first three quarters of 2026, the year-on-year decline in the Group's cumulative revenue narrowed slightly as compared with that for the first half of the year. The Group expects its results for the fourth quarter of 2026 to be significantly better than those for the third quarter, and expects its annual results to remain stable as compared with last year after excluding the one-off compensation arising from workforce structure optimisation. This was mainly attributable to the following factors: (1) the Company continued to advance its "AI First" strategy, accelerating the evolution of its core products and service systems towards AI-native architectures, while vigorously expanding its business in areas including AI large model application and delivery, Token operations and computing power services, thereby accelerating the implementation of its AI-related businesses, building a foundation for the industrial ecosystem, and evolving from a deliverer of AI into a value co-creation partner in industrial intelligence; (2) the Company continued to advance the comprehensive AI-native evolution of its telecom software business. Leveraging its long-standing experience in supporting the core businesses of telecommunications operators, serving industry customers and providing engineering delivery, the Company deepened its cooperation with the operators in areas including connectivity, computing power, services and security, and promoted the evolution of traditional connectivity operations towards intelligent and task-oriented operations; (3) the Group's customers are concentrated in the field of central and state-owned enterprises, which generally adopt centralised procurement and budget management systems. Their procurement activities are subject to significant seasonality, and accordingly, the Group's operating results also exhibit certain seasonal characteristics, with revenue and profit generally concentrated in the second half of the year. The Group therefore expects its results for the fourth quarter to be significantly better than those for the third quarter; and (4) the Group proactively and effectively controlled its costs and expenses.

In addition, during the first three quarters of 2026, the Company continued to step up its efforts in expanding its AI-related businesses and further enhanced its full-chain service capabilities spanning model capabilities, engineering delivery, resource scheduling, Token operations and trusted governance. Among these, revenue from the smart digital operation business (AI-related businesses) increased by approximately 61.9% year-on-year, while the contract value of orders in the non-operator market more than doubled, with a matrix of leading industry customers taking shape and multiple benchmark projects delivered steadily. In terms of AI ecosystem partners, the Company joined the Kimi Enterprise Partner Program, continued to strengthen its FDE (Forward Deployed Engineer) engineering delivery capabilities, and entered into strategic cooperation with leading chip manufacturers, as well as AI computing power and inference software companies, to promote the coordinated development of its capabilities in models, computing power and Token operations. In terms of business implementation, the TokenTOP operations support platform has delivered a settlement case for multi-agent collaborative invocation chains, while continuing to advance the

development of its capabilities in Token production, supply, metering and operation, and accelerating the integration of AI capabilities into core enterprise business scenarios. In terms of Physical AI, the Company and ABB jointly signed their first customer project and completed its acceptance.

The Group will continue to consolidate its core operator business and accelerate the scaled development of its growth businesses such as the computing power and AI-related businesses, while actively positioning itself in emerging businesses such as satellite internet and Physical AI, so as to continuously optimise its business structure, cultivate new growth drivers and create more business growth opportunities for the Group.

The information contained in this announcement has been prepared based on the management accounts and internal management records of the Group, which have not been audited or reviewed by the Company's auditors. Due to various uncertainties in the process of collecting and compiling such data, these data may differ from those disclosed in the audited or unaudited consolidated financial statements published by the Company on an annual or semi-annual basis. Therefore, the above information is provided for reference purposes only.

The shareholders and potential investors of the Company should note that all the figures contained herein are unaudited. Accordingly, figures contained in this announcement should in no way be regarded as providing any indication or assurance on the financial results of the Group for the nine months ended 30 September 2026. The shareholders and potential investors of the Company are advised to exercise caution when dealing in the securities of the Company and should avoid placing undue reliance on such information. If in doubt as to their investment position, they should consult their own professional advisers.

By order of the Board
