Of which electricity sales volume (*million kWh*)	1,640	1,245	31.7%

Note: The Group's operational data disclosed in this announcement included the data of its subsidiaries, joint ventures and associates.

The Board of Directors (the "**Board**") of ENN Energy Holdings Limited (the "**Company**" and together with its subsidiaries, the "**Group**") is pleased to announce certain unaudited operational data of the Group, its joint ventures and associates for the nine months ended 30 September 2026 (the "**Period**"), and the comparative figures for the corresponding period in 2025. In accordance with its established practice, this announcement is made by the Company on a voluntary basis, which is based on the operational information available to the Company for the purpose of keeping shareholders and potential investors informed of the latest development of the Group.

In the first three quarters of 2026, China's gross domestic product (GDP) grew by 4.6% year-on-year. Capitalising on these market opportunities, the Group has accelerated the development of new growth engines centered on intelligent and green development, while continuing to strengthen our innovation-driven capabilities and expedite strategic execution to ensure sustained, high-quality growth.

Natural Gas Sales Business

During the Period, the Group's retail gas sales volume recorded a year-on-year increase of 0.2% to 19,230 million cubic meters. Among these, gas sales volume to commercial and industrial ("**C/I**") customers increased by 0.4% year-on-year to 15,273 million cubic meters, while gas sales volume to residential households increased by 1.4% year-on-year to 3,856 million cubic meters.

During the Period, the Group's construction and installation progress for new C/I and residential customers remained steady. Installed designed daily capacity for newly acquired C/I customers reached 9.2962 million cubic meters, and the Group has completed construction and installation for around 735,500 new residential households.

Driven by the national "dual carbon" strategy, the low-carbon transition of the energy structure is accelerating, with natural gas further consolidating its role as a key clean transitional energy source. In 2026, the Group has fully capitalised on opportunities arising from green upgrading while adhering to its "Scale-driven Profitability" strategy. We precisely addressed the diverse needs of large group customers, industrial energy-saving retrofits, and small and medium-sized C/I customers. By optimising resource portfolio allocation, rigorous procurement cost management, and intelligent, precise matching of supply and demand, the Group has steadily expanded its customer base and further solidified the foundation for the sustainable development of its natural gas business.

Integrated Energy Business

During the Period, the Group's sales volume of integrated energy decreased by 7.2% year-on-year to 26,909 million kWh, primarily due to adjustments in the external economic structure. The Group seized the opportunities arising from power market reforms and promoted the "Load-Source-Grid-Storage-Carbon" integrated model to accelerate the development of its power business. The Group's electricity sales volume recorded an increase of 31.7% year-on-year to 1,640 million kWh. Going forward, the Group will continue to optimise its integrated energy business mix, refine its business model and enhance its profitability.

Smart Home Business

During the Period, the Group enhanced its product varieties and deepening business scenarios in its smart home business, and continued to expand its customer base. As of 30 September 2026, the penetration rate of the Group's existing customer base was 12.7%, while that of newly-developed customers was 70.0%. "Promoting consumption" remains an important driver of domestic demand expansions in 2026. The Group continues to strengthen customer recognition and engagement. Leveraging the "e-City e-Home" platform and the resources of both internal and external

ecosystems, the Group has delivered products and services better to meet household's demand for a quality lifestyle through smart solutions, thereby further enhancing its smart home business.

By order of the Board
ENN ENERGY HOLDINGS LIMITED
WANG YUSUO
