## VOLUNTARY ANNOUNCEMENT — EXPECTED SUCCESSFUL BID FOR CENTRALISED PROCUREMENT PROJECT OF CHINA TELECOMMUNICATIONS CORPORATION ("CHINA TELECOM") IN RESPECT OF FEEDER CABLE AND ACCESSORIES PRODUCTS (YEAR 2026 TO YEAR 2028)

This is a voluntary announcement made by Trigiant Group Limited (the "**Company**", together with its subsidiaries, the "**Group**").

The board of directors of the Group is pleased to announce that China Telecom published a notice of bidding results (hereinafter referred to as the "**Notice**") on the Centralised Procurement Project of China Telecom in respect of Feeder Cable and Accessories Products (Year 2026 to Year 2028) on its online business platform on 28 October 2026. According to the Notice, 江蘇俊知技術有限公司 (Jiangsu Trigiant Technology Co., Ltd.*) (hereinafter referred to as "**Trigiant Technology**"), a wholly-owned subsidiary of the Group, is the relevant prospective successful bidder. The details of the prospective successful bids are as follows:

Package 1: Feeder Cable: Trigiant Technology's total bid price, excluding tax is RMB737,628,058.63, and it is ranked fifth in the tender.

Package 2: Feeder Cable Accessories: Trigiant Technology's total bid price, excluding tax is RMB88,334,435.84, and it is ranked second in the tender.

China Telecom is one of the Group's major clients, and feeder cable products (signal cables and high-speed copper cables) have been the Group's traditional flagship products since its establishment nearly two decades ago. Since the beginning of this year, the Group has

maintained robust orders for signal cables, primarily benefiting from the continued global development of computing infrastructure for Artificial Intelligence Data Centres ("**AIDC**"). This has also been supported by the Group's newly expanded optical fibre and optical fibre cable business, which has generated significant business synergies within the networks of the three major telecommunications operators in the PRC.

The Group has stood out among its industry peers to achieve the above results. Following the recent completion of the acquisition and integration of upstream optical fibre preform production capacity, the Group has completed its optical communications business portfolio and established a fully integrated industry chain spanning optical fibre preforms, optical fibres and optical fibre cables, substantially enhancing the Company's core competitiveness and market influence in the optical communications industry. The Group's selection as a prospective successful bidder marks another milestone for the Group and serves as the best illustration of the synergies and brand benefits generated by its new business. The Group expects to further increase the penetration of its full range of cable products within the networks of telecommunications operators.

The publicity period of the Notice, which ran from 29 October to 2 November 2026, has ended. Investors are advised to exercise caution in making investment decisions and to take precautions against investment risks.

On behalf of the Board
**Trigiant Group Limited**
