VOLUNTARY ANNOUNCEMENT — BUSINESS UPDATE

This announcement is made by CA Cultural Technology Group Limited (the "**Company**", together with its subsidiaries the "**Group**") on a voluntary basis to keep its shareholders and potential investors informed of the latest strategic business developments of the Group.

Reference is made to the Company's announcement dated 24 September 2026, which sets out, among other things, the Group's development strategy to enhance its existing business through the application of artificial intelligence (AI), including but not limited to, its smart equipment and toys.

The board of directors (the "**Board**") of the Company wishes to inform its shareholders and potential investors that the Group is currently in negotiations with various data centre operators in Japan regarding the potential leasing and allocation of infrastructure capacity (the "**Reserved Capacity**").

The Group continues to expand its product ecosystem towards intelligent, real-time interactive, and spatial multimedia offerings. The proposed arrangements in respect of the Reserved Capacity are intended to secure dedicated, high-performance IT infrastructure and edge-computing capacity to support the Group's existing AI-driven toys, interactive character IPs, and multimedia augmented reality (AR)/virtual reality (VR) operations. The deployment of real-time conversational AI models and high-fidelity AR/VR streaming requires reliable high-density compute power, low-latency network routing, and continuous data security.

By collaborating with specialized data centre operators, the Group expects to secure reliable, high-performance data centre infrastructure and edge-computing capabilities without incurring immediate heavy capital expenditure on hardware ownership. This approach is expected to accelerate the commercialization of the Group's AI toys and AR/VR operations while providing scalability and operational resilience during peak demand periods. In addition, the use of established and certified data centres is expected to provide enterprise-grade physical security, isolated edge node processing, and audit compliance, thereby helping to mitigate regulatory and operational risks. The Board considers that the negotiation and potential execution of the Reserved Capacity with specialized data centre operators is in the strategic interests of the Group and its shareholders as a whole.

By order of the Board
CA Cultural Technology Group Limited
Chong Heung Chung Jason
Chairman and Executive Director

Hong Kong, 6 November 2026
