Shanghai Fosun Pharmaceutical (Group) Co., Ltd.* Announcement in Relation to the Progress of Drug Clinical Trial By a Subsidiary

The board of directors of the Company and all directors warrant that this announcement does not contain any false information, misleading statement or material omission, and accept legal liability for the truthfulness, accuracy and completeness of the contents herein contained.

I. Overview

Recently, Fosun Pharmaceutical Industrial Development (Shenzhen) Company Limited* (復星醫藥產業發展(深圳)有限公司), a subsidiary of Shanghai Fosun Pharmaceutical (Group) Co., Ltd.*（上海復星醫藥（集團）股份有限公司）(the "Company"), initiated the Phase II clinical trial of FXR0906 Injection ("**FXR0906**") for the treatment of Hypertriglyceridemia in Chinese mainland[1].

II. Basic Information and Development Progress on FXR0906

FXR0906 is a liver-targeted small interfering RNA (**siRNA**) drug licensed by the Group (i.e., the Company and its subsidiaries/units, the same applies below). The Group enjoys the exclusive right to research, develop, register, manufacture and commercialize FXR0906 in Chinese mainland, Hong Kong and Macau.

As of October 2026, the Group has invested approximately RMB80 million (including license fees; unaudited) in total in the research and development of FXR0906 at this stage.

[1] Excluding Hong Kong, Macau and Taiwan regions for the purpose of this announcement, the same applies below.

As of the date of this announcement (i.e. 16 November 2026), no siRNA drug for the treatment of hypertriglyceridemia has been approved for launch in Chinese mainland.

III. Risk Reminder

As required by the relevant regulations, FXR0906 is still required to undergo relevant clinical trials in Chinese mainland and obtain approval from the national drug review authority before it can be launched.

The process from drug development and clinical research to launch involves a long period and multiple stages, with various uncertainties. Investors should take note of the investment risks.

Announcement is hereby made.
