The Company's shares are listed on the Main Board of The Stock Exchange of Hong Kong Limited (the "**Stock Exchange**"). On 3 December 2025, the Company was successfully listed on the Catalist Board of the Singapore Exchange Securities Trading Limited ("**SGX-ST**").

The Company is an investment holding company. The Group is principally engaged in the manufacture and sale of adhesives, primers, hardeners and other adhesive related products mainly used by footwear manufacturers.

In the opinion of the directors of the Company (the "**Directors**"), All Reach Investments Limited, a company incorporated in the British Virgin Islands, is the immediate and the ultimate parent and Mr. Ieong Un is the ultimate controlling party of the Company.

The consolidated financial statements are expressed in Hong Kong dollars ("**HK$**"), and all values are rounded to nearest thousand (HK$'000), except when otherwise stated.

2. BASIS OF PREPARATION

These consolidated financial statements have been prepared in accordance with all applicable IFRS Accounting Standards issued by the International Accounting Standards Board ("**IASB**"). IFRS Accounting Standards comprise International Financial Reporting Standards ("**IFRSs**"); International Accounting Standards ("**IASs**"); and Interpretations. These consolidated financial statements also comply with the applicable disclosure provisions of the Rules Governing the Listing of Securities on the Stock Exchange and with the disclosure requirements of the Hong Kong Companies Ordinance, as well as the applicable disclosure provisions of the Listing Manual (Section B: Rules of Catalist) of the SGX-ST.

The IASB has issued certain new and revised IFRSs that are first effective or available for early adoption for the current accounting period of the Group. Note 3 provides information on any changes in accounting policies resulting from initial application of these developments to the extent that they are relevant to the Group for the current and prior accounting periods reflected in these consolidated financial statements

3. ADOPTION OF NEW AND REVISED IFRS ACCOUNTING STANDARDS

New and revised IFRS Accounting Standards in issue but not yet effective

The Group has applied the following amendments to IFRS Accounting Standards issued by the IASB for the first time, which are mandatorily effective for the annual period beginning on or after 1 October 2025 for the preparation of the consolidated financial statements:

Amendments to IAS 21 and IFRS 1	Lack of Exchangeability

Up to the date of issue of these consolidated financial statements, the IASB has issued a number of new standards and amendments to standards and interpretation, which are not effective for the year ended 30 September 2026 and which have not been adopted in these financial statements. The Group has not early applied the following which may be relevant to the Group:

	Effective for accounting periods beginning on or after
Amendments to IFRS 9 and IFRS 7 – Classification and Measurement of Financial Instruments	1 January 2026
Annual Improvements to IFRS Accounting Standards – Volume 11	1 January 2026
Amendment to IFRS 9 and IFRS 7 – Contracts Referencing Nature-dependent Electricity	1 January 2026
Amendment to IAS 21 – Translation to a Hyperinflationary Presentation Currency	1 January 2027
IFRS 18 – Presentation and Disclosure in Financial Statements	1 January 2027
Amendments to IAS 28 – Amendments to the Fair Value Option for Investments in Associates and Joint Ventures	1 January 2027
IFRS 20 – Regulatory Assets and Regulatory Liabilities	1 January 2029
Amendments to IFRS 10 and IAS 28 – Sale or Contribution of Assets between an Investor and its Associate or Joint Venture	To be determined by the IASB

The directors of the Company are in the process of making an assessment of what the impacts of these new standards, amendments to standards and interpretation are expected to be in the period of initial application. So far it has concluded that the adoption of them is unlikely to have a significant impact on the consolidated financial statements, except for the following:

IFRS 18 "Presentation and Disclosure in Financial Statements"

IFRS 18 will replace IAS 1 "Presentation of financial statements", introducing new requirements that will help to achieve comparability of the financial performance of similar entities and provide more relevant information and transparency to users. Even though IFRS 18 will not impact the recognition or measurement of items in the consolidated financial statements, IFRS 18 introduces significant changes to the presentation of financial statements, with a focus on information about financial performance present in the statement of profit or loss, which will affect how the Group present and disclose financial performance in the financial statements.

The new accounting standard introduces the following key new requirements:

- Entities are required to classify all income and expenses into five categories in the statement of profit or loss, namely the operating, investing, financing, discontinued operations and income tax categories. Entities are also required to present a newly-defined operating profit subtotal. Entities' net profit will not change.

- Management-defined performance measures (MPMs) are disclosed in a single note in the financial statements.

- Enhanced guidance is provided on how to group information in the financial statements.

In addition, all entities are required to use the operating profit subtotal as the starting point for the statement of cash flows when presenting operating cash flows under the indirect method.

The Group is currently assessing the impact of IFRS 18, with respect to the structure of the Group's statement of profit or loss, the statements of cash flows and the additional disclosures required for MPMs. The Group is also assessing the impact on how information is grouped in the financial statements. Preliminary assessments indicate the following key impacts:

- The Group will need to reclassify certain income and expense items (e.g., interest income on certain investments and foreign exchange gains/losses) into the new categories, namely investing and financing categories.

- The Group is identifying certain MPMs (e.g., adjusted operating profits and adjusted EBITDA). Under IFRS 18, this will likely require additional disclosure for the MPMs within the notes to the financial statements.

- The Statement of Cash Flows will also be impacted, as the operating profit subtotal will be the required starting point for the indirect method.

The directors of the Company are currently assessing the impact of applying IFRS 18 on the presentation and the disclosures of the consolidated financial statements.

4. USE OF JUDGEMENTS AND ESTIMATES

The preparation of these consolidated financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

In preparing these consolidated financial statements, the significant judgements made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were primarily consistent as those that applied to the audited consolidated financial statements for the year ended 30 September 2025.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

Information about key sources of estimation uncertainty that have the most significant effect on the amounts recognised in the financial statements is summarised as follows:

(a) Measurement of expected credit loss of trade and bills receivables

(b) Assessment of allowance for slow-moving inventories and net realisable value of inventories

5. REVENUE AND SEGMENT INFORMATION

Operating segment information

The Group has only one operating and reportable segment. Management determines the operating segment based on the information reported to the Group's chief operating decision makers ("**CODMs**") (i.e. the executive Directors). The CODMs assess the operating performance and allocate the resources of the Group as a whole as the Group is principally engaged in the manufacture and sale of adhesives, primers, hardeners and other adhesive related products mainly used by the footwear manufacturers. Accordingly, there is only one operating and reportable segment.

No analysis of segment assets and liabilities is presented because the CODMs do not base on such analysis for resource allocation and performance assessment.

BUSINESS REVIEW AND PROSPECTS

Businesses

For the year ended 30 September 2026, the Group was principally engaged in the manufacture and sale of adhesives, primers, hardeners and other adhesive related products used by footwear manufacturers. The Company has also sought a dual primary listing and the shares of the Company have been successfully listed on the Catalist Board of the SGX-ST since 3 December 2025.

For more than 20 years, the Group has, following the footstep of its customers, diversified its production bases into the South-east Asia to better cope with the increasing demands from the region, which in turn enhances the competitiveness of the Group. As at 30 September 2026, the Group had manufacturing plants in the PRC, Vietnam and Indonesia respectively. The new manufacturing plant constructed in Indonesia officially commenced production in June 2026.

With the above development, the Group believes that it could better serve its customers by improving its local competitiveness and freight time advantages, and further solidify its core business. If necessary, the Group will consider to further expand its existing manufacturing facilities and implement any new manufacturing plants to satisfy its prestige customers' needs.

Cost control

The Group will continue to carefully review and extensively evaluate the current situation of costs and resources deployment. In response to the uncertainties arising from the continued instability in the Middle East, the Group will consider to strengthen its control over the operational costs proactively and effectively in the short term.

Research and development

The Group is always environmental-oriented, continuously dedicated to developing high-quality products that meet market needs, and closely monitors future market trend, constantly researching and developing products that meet the future development needs of the industry. In addition to its own research and development team, the Group also cooperated with several internationally well-known chemical corporations (including those from Germany and Japan) to develop new products and entered into technology cooperation agreements with several sophisticated technology experts in the industry (including those from countries and regions such as Japan, Taiwan and Hong Kong). It is expected that, through the above measures, they will strengthen the Group's R&D capabilities, thereby maintaining the leading technological position in the industry.

Prospects and commentary of significant trends and competitive conditions of the industry

Short to medium term outlook: In view of the uncertainties arising from the continued instability in the Middle East, as well as more cautious purchasing intentions among footwear consumers, it is difficult for the Board to predict the sales performance of the Group for the year ending 30 September 2027.

Medium to long term outlook: As the global demand for footwear is still growing continually, more stringent requirement from the manufacturers for the quality of adhesives would gradually eliminate industry players with less competitiveness and the demand for the use of environmental water-based adhesive products by footwear brands and manufacturers will still be growing, the effect of the previous regional deployments of the Group has become prominent in response to the market changes. The Group has been maintaining partner relationship with its prestige customers for a number of years. As such, the Board expects that the growth of the Group's sales in the medium to long term will remain stable. The Group will continue to devote necessary resources to further increase its market share if feasible.

Leveraging on the Group's solid experience accumulated over the years, its high quality products recognised by the market and its competence in research and development capabilities, the Group will continue to commit to its core business. The Group will also consider to invest and develop its OEM business in a proactive manner in order to broaden its revenue base.

Looking ahead, the Board will remain prudent about the long-term prospects of the Group's core business. The Group will follow a very cautious approach to ensure corporate sustainability for the year ending 30 September 2027. The Group will continue to focus on cost control, operational efficiency and monitor the working capital management closely. The Group will also pay close attention to the latest developments in the footwear manufacturing industry and its core business, as well as the latest developments in the instability in the Middle East and adhesive-related market, and adjust the business strategies in a timely manner as required.
